

Square Stackable

The industry's best selling plastic IBC has been copied often, but the Square Stackable's proven performance and value proposition has never been duplicated. The quality of an IBC is mostly dependent on a manufacturer's experience, which Snyder is second to none. While other manufacturers may use a similar, but not exact, molding process, their inexperience is often revealed in the lacking performance and longevity of their IBCs. Square Stackable's rotationally molded, all poly design also eliminates the corrosion and maintenance problems associated with poly-composite IBCs. A heavy duty base and sturdy bottom-drain valve construction reduce the expensive maintenance cost of blow-molded IBCs.

The difference is the engineering. From initial product design, through the unique proprietary machines and molding processes to the careful testing and approval of supplier components and accessories. Snyder's engineering expertise is unparalleled, as demonstrated by Square Stackable's 20+ year track record of dependable hazardous chemical service in the most demanding applications.

Don't be tempted by inferior lookalikes. When your company is seeking the best value and performance in their IBC system, there is no substitute for the Square Stackable.

Features:

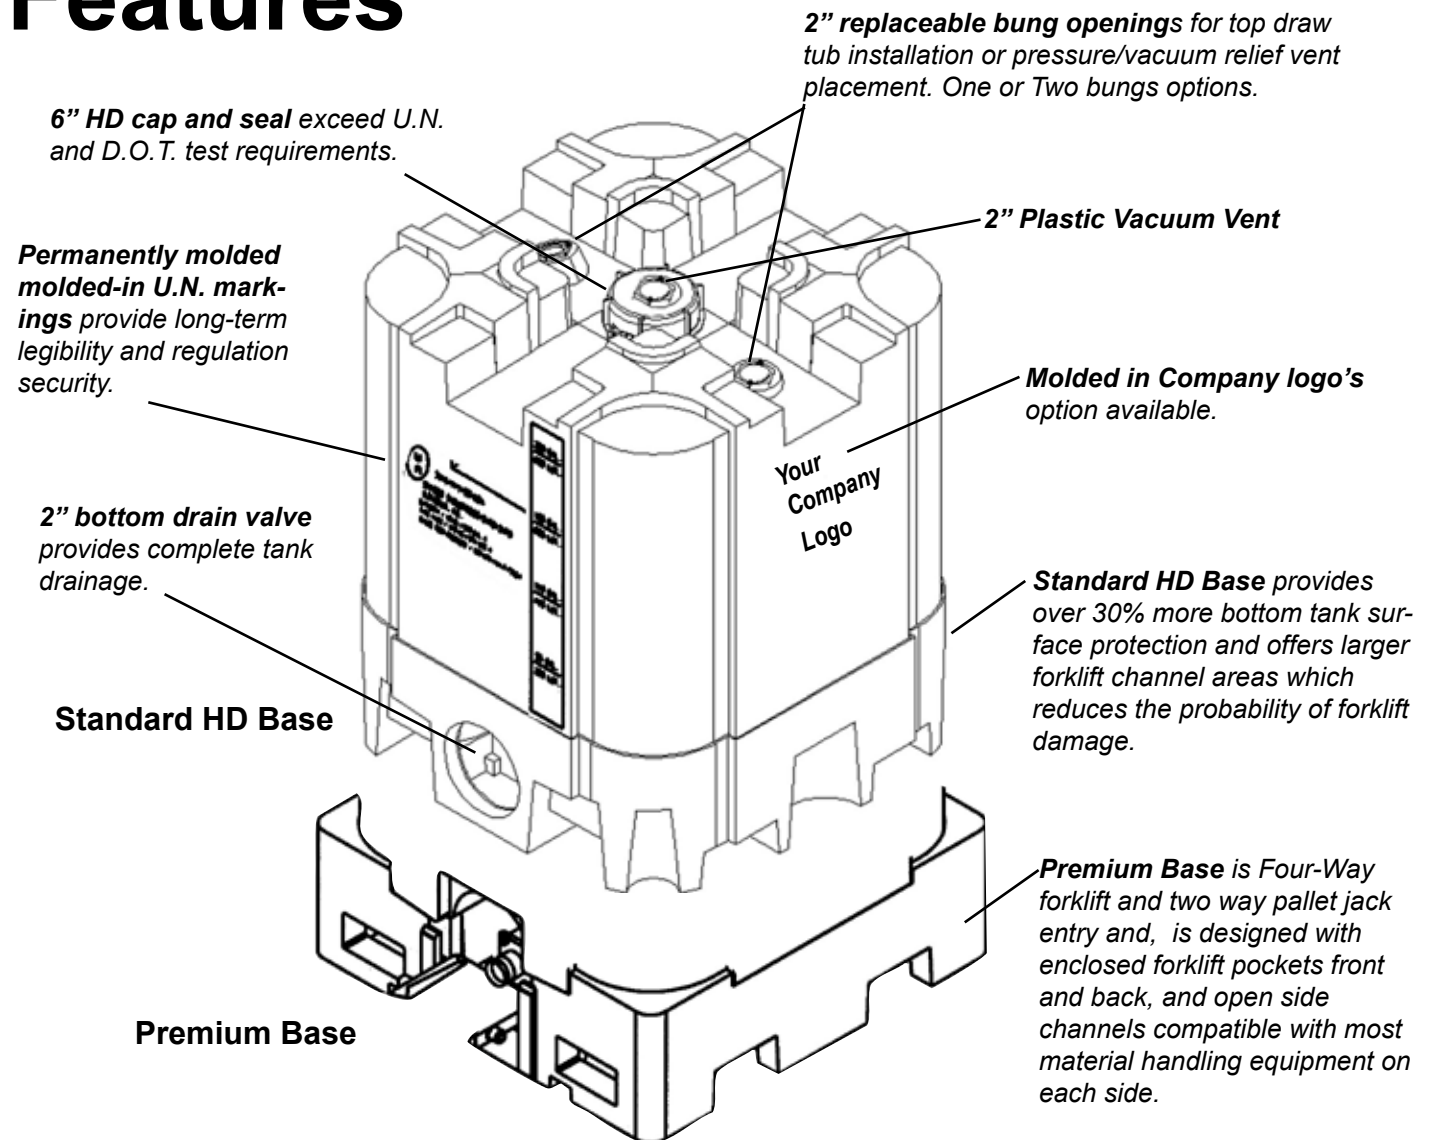

- Four way forklift and 2 way pallet jack access bases
 - Standard HD Base**
 - 30% more bottom tank surface coverage
 - Less Expensive (over 10%), and easier to replace
 - Larger forklift channel area
 - Reduces overall height of container
 - Standard Color - Black. (Other color options available)
 - Premium Base**
 - Safety forklift channels
 - Standard Color - Red (Other color options available)
- Standard 2" male camlock bottom drain (1.5" ball)
- 6" fill cap opening with security tether
- Molded-in gallonage markers
- Tamper-evident eye bolts
- 1 or 2 —2" bung locations on Square Stackables

Snyder's Premium Square Stackable package offers additional tank fitting options.
